This book addresses central and poignant questions to Britain's decision to acquire, deploy and maintain a strategic nuclear deterrent. The scene is set with a resume of the historical background from the discovery of nuclear fission in early 1939 to the deployment of the V-bomber force in the 1950s.

Plus a great chart showing Britain's nuclear deterrent capability from 1962-1970 and another one showing "The Growth of the French SSBN Force", from 1971-1993. The sections detailing the impact of Britain's nuclear forces on its overall defense spending and the economic impact overall are helped by three very explanatory charts.

Having served opposite Warsaw Pact forces in the 1950s and on Embassy duty in the 70s in Europe, the author offers a reasoned assessment of Britain's role in the so-called "nuclear club". T HIS CONCLUDING CHAPTER summarises the main themes of the book and seeks to provide answers to the two following questions. First, does the analysis of the political, operational and economic factors indicate that Britain was 'right' to procure and deploy the V-bomber force and subsequently to replace it with Polaris and thereafter with Trident?
