Mathmusic.org brings invaluable answers on graphing inequalities on a number line calculator, multiplying and trigonometric and other math topics. If ever you require guidance on matrices or powers, Mathmusic.org is always the perfect destination to have a look at!

Graphing an inequality on a number line, is very similar to graphing a number. For instance, look at the top number line $x = 3$. We just put a little dot where the '3' is, right? For instance, look at the top number line $x = 3$.

Hi! I guess I can help you out on how to solve your homework. But for that I need more specifics. Can you give details about what exactly is the graph inequalities on a number line calculator homework that you have to solve.

Directions: In the applet below, you'll see an inequality. Move the BLUE POINT above the number line below and adjust the red and blue sliders (off to the top right) so that the graph you create is the graph of the inequality shown.

It also shows you how to plot / graph the inequality solution on a number line and how to write the solution using interval notation. This video contains plenty of examples and practice problems.

By Jeff McCalla, C. C. Edwards . Your TI-84 Plus calculator was not made to graph inequalities on a number line, but it can be used to accomplish that task.
