In Growing Food in a Hotter, Drier Land, Gary Paul Nabhan, one of the world’s experts on the agricultural traditions of arid lands, draws from the knowledge of traditional desert farmers to offer time-tried strategies including building greater moisture-holding capacity and nutrients in soils, protecting fields from damaging winds, drought and floods, reducing heat stress on crops and livestock and keeping pollinators in pace and in place with arid-adapted crop plants.

Growing Food in a Hotter, Drier Land book. Read 11 reviews from the world's largest community for readers. How to harvest water and nutrients, select dro...

If Growing Food were written by someone, like me, who has spent a whole lot of time reading about concepts but not much time implementing them, then I’d be the first to say no one should pay attention to it. But this isn’t the case. Nabhan has traveled the world to see how people have been growing foods in hotter drier lands for generations.

Growing Food in a Hotter, Drier Land With little room for the hand-wringers, Nabhan provides everyone else, from novice gardener to deep ecologist, important food for thought and the practical know-how to address our modern problems with ancient desert wisdom.

“In Growing Food in a Hotter, Drier Land Gary Paul Nabhan has crafted a cogent treatise blending his own considerable knowledge and experience with the traditional ecological wisdom of indigenous desert farmers, who have been thriving in the face of climate uncertainty for many generations.

Awards As you scroll down the page, you can read about the awards that Gary has received over the years. Candidates for the awards are recommended by a network of writers, literary scholars, publishers, and editors, who show outstanding work.
