

# Download How Castles Were Built The Age Of Castles

As the castle wall gets higher, new scaffolding must be placed in the wall and the old ones removed, leaving square holes in the walls. As of 2007, Castle Guedelon is about a third complete. As of 2007, Castle Guedelon is about a third complete.

What did wooden castles look like and how were they built? - Duration: 24:35. Shadiversity 416,533 views. 24:35.

Many European castles were built exclusively from earth and timber. There are examples of several such castles that were maintained in operational state for 400-500 years. Creating castles from bricks was also present. Those castles were strong and long-lasting, and could be created with less experienced workforce.

All up, more than 1500 castles were built in England alone during the next 5 centuries. Throughout of our "castle-story" we will see how were castles built and how did castle-design evolve over time. Next, let's take a look at the Motte-and-Bailey Castles , the first ever type of castle.

Castle building through the ages How Castles Were Built (The Age of Castles) by Peter Hicks describes castle building from the earliest castles, which were made of wood, to the great stone castles built at the time of the crusades for children.

The castles in the Middle Ages were built for protection. The main purpose behind building a castle was originally protection from foreign invaders.

The first castles were built by the Normans The great age of castles began almost 1,000 years ago and lasted for nearly 500 years. The Normans introduced the first proper castles, starting with the wooden Motte and Bailey castles, to England following their victory at the Battle of Hastings in 1066.
