

# Download Magnetism And Transport Phenomena In Spin Charge Coupled Systems On

Study of novel magnetic states and exotic transport phenomena in Kondo lattice systems is a field experiencing rapid progress. The interplay of charge and spin degrees of freedom potentially gives rise to various novel phases and transport phenomena which are related to strongly correlated electrons, frustrated magnetism, and topological states of matter.

In this chapter, we study a spin-ice type Kondo lattice model on a pyrochlore lattice. The finite temperature phase diagram of the Kondo lattice model is studied by using an efficient Monte Carlo method using the polynomial expansion technique (Sect. 2.3).

Magnetism and Transport Phenomena in Spin-Charge Coupled Systems on Frustrated Lattices (Springer Theses) | Hiroaki Ishizuka | ISBN: 9784431563051 | Kostenloser Versand für alle Bücher mit Versand und Verkauf durch Amazon.
