This week's book is The Intel Trilogy: How Robert Noyce, Gordon Moore, and Andy Grove Built the World's Most Important Company by Michael Moore.

Noyce, the most respected high tech figure of his generation, brought credibility (and money) to the company's founding; Moore made Intel the world's technological leader; and Grove, has relentlessly driven the company to ever-higher levels of success and competitiveness. Without any one of these figures, Intel would never have achieved its historic success; with them, Intel made possible the personal computer, Internet, telecommunications, and the personal electronics revolutions.
