Tinnitus can be caused by a number of conditions, such age-related hearing loss, earwax, pressure or fluid in the middle ear, exposure to loud noises, head injury, or systemic conditions such as high blood pressure. Certain medications can also cause or worsen tinnitus.

For many other causes there may be no way to prevent the accompanying tinnitus symptoms. There is currently no cure for most cases of tinnitus. Symptoms of tinnitus may come and go over time, and if you have had tinnitus it's likely it will recur.
